the x-ray the young Dr. asked Carter to verify a pubic ramus fracture did not even show the pubic rami, they were clipped off at the bottom of the film. where the hell are the med. pros. when doing this series?

If I had to guess I would assume there is some Hollywood stock x-ray prop place that sells images of different kinds of injuries. I think you are reaching a bit with this given that only people who worked in radoiology or are super obsessive about medical accuracy would notice this.

Carter; Please stop acting like a spoiled little boy. You haven't so far thru this series, why start now.
